Subject: Current List of 37 Projects

Hello Bob:

As per our meeting of February 24, and our review of the binder with the 37 applications for the lower mainland region, please find attached a spreadsheet that lays out the paddler's immediate concerns for the projects listed.

Please note that this is what the paddling community sees as the major areas of concern - with respect to whitewater use on the streams, and as discussed, we hope that this information might be conveyed to BC Hydro, as there are certainly streams that will have many more issues, from our perspective, than will others.

Thanks for the opportunity to review this material in advance of the actual referrals arriving, and for the heads up on the magnitude and general information in this list.

Hopefully this will assist you with dealing with all of these projects.

Cheers

Stuart
